> Poth wired wireles	c routors and switch	ing devices are not normit	ted to be

- Both wired, wireless routers and switching devices are not permitted to be connected to the Virginia State University Network. Such Devices will be disabled once discovered.
- The wireless network uses WEP security. Once your request has been processed and approved you will be issued the required WEP key to access the AirGames Access Point (AP)
- The key will only work for the ENTIRE school year. You will be given ONE WEP KEY for multiple gaming consoles (only one console can be connected to the Internet at a given time)
