

Confidential STI Testing*

Why get tested ?

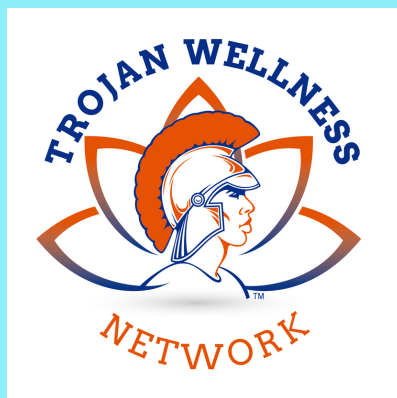

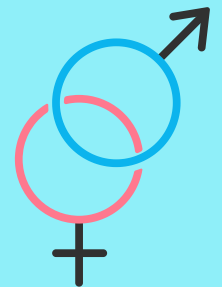

You can pick up an STI, like chlamydia, gonorrhea, or HIV no matter how you're hooking up. Yup, vaginal, oral, or anal sex can spread STI's. Getting tested is part of staying healthy

1 in 2 Sexually Active People Get an STI by age 25

Statistically, that's one of your friends. It's more common than you think!

GET TESTED!
Sex is a choice.
But the facts are clear.
