

Request to Create a New Account

NATIONAL INSTITUTES OF HEALTH eRA Commons

NIH now requires all applicants to complete the registration process in the eRA Commons prior to proposal submission. If an applicant has started the registration process at least two weeks in advance of the submission date, NIH will consider it a “good faith” effort to prepare for electronic submission and the applicant will not be penalized for any NIH-caused registration processing delay.

For Principal Investigators (PI) with previous NIH support, please provide as much of the optional data as possible to enable the NIH to associate the new account to the PI’s existing profile already recorded at the NIH.
