

Gartner Campus Access

This partnership is intended for the purpose of enhancing the teaching and learning experience. Campus Access allows all students and faculty at Virginia State University to easily access web portal, they can search and download the latest Gartner research, including real-life examples of how technology is used.

Why Students, Faculty and Staff would be interested?

- o Every major has a specific technology in the real world, so Gartner's research can open up the world to how technology is being used in specific industries so you are ahead of the curve when you graduate.
- o Gather data to support class projects, papers and presentations
Research business issues in your industry.
- o Keep up-to-date on new tech gadgets in all industries and how to use them.
- o Gain additional resources to triangulate and support data is imperative when presenting a well-rounded case study to support your academic pursuits.
- o Bring timely, objective real-world examples and content to the classroom.
- o Include Gartner best practices and data frameworks to their curriculum as a means for enriching it with real time updates.
- o Use the data and information to substantiate research papers
Researching emerging technologies and industry trends
Look at the health of a company.
- o Discover new educational technologies and best practices
- o Access to current and objective research on technology and how it enhances the technological understanding of the student's research in their industry.
